# Thigh Deboner

## Key Benefits

- The Thigh Deboner is specially designed to debone dark meat (thighs, drumsticks optional) in a cost-effective and efficient manner.
- The machine is based on the industry-tested “diaphragm” principle with a capacity of up to 2400 pieces per hour.
- In this process almost all meat is stripped off the bone, resulting in minimal meat loss during deboning, hence greater profitability.
- Optional knuckle saw device to allow for drumstick cutting on the same deboner
- Different size diaphragms can be utilized to accommodate for various drumstick or thigh sizes
